

ABSTRACT

A method and terminal for displaying information on a display, where the information is provided with elements. An element is either having a continuous length presenting a length which is equal to or greater than the size of said display, or a wrapped length presenting a length which is less than the size of said display. The display is further provided with a user interface having a menu structure of items. The user interface is provided with a selectable continuous length item and a wrapped length item. The information is displayed according to the selection made in the menu structure of the user interface, in order to allow the user to toggle between continuous length and wrapped length.
